Uniflight Completes New AS350 B2 for LW Engineering

Wednesday, August 26, 2009 - Uniflight, LLC

Uniflight, LLC recently completed and delivered a brand new Eurocopter AS350B2 for LW Engineering. The AS350 underwent an Avionics Completion, Paint in addition to an Integrated Air Systems Air Conditioning System. Uniflight's unprecedented quality was applied to the installation of every item and an on-staff pilot test-flew the aircraft prior to delivery.

James Loftin, President of Uniflight said: "We are very pleased to have this opportunity to perform a completion for LW Engineering, as well as the ongoing maintenance of the aircraft. I am especially proud of the talent and expertise of our employees. Through their commitment and dedication we seek to earn our customer continuing faith and confidence. Our location on Grand Prairie Municipal Airport has allowed us to develop a relationship with American Eurocopter that provides a high level of support for our common customer.

About Uniflight, LLC

Uniflight, LLC, FAA Repair Station UNFR783K, is a specialized helicopter overhaul and repair service center. The Company has earned its reputation over three decades through prompt and professional response in support of government and commercial helicopter operators.
